KANTECH / access control and integrated systems

Restoring, Using the EntraPass Demo Backup

1- Install the Entrapass Edition – DEMO – found under the reference CD or downloaded from the website www.kantech.com
2- Uncompressed the ENTRAPASS DEMO BACKUP downloaded from the website store the file on your hard drive.
3- Reboot the computer.
4- Connect your demo unit to your computer.
5- Execute the EntraPass DEMO Edition application.
6- Login (user name and password is already typed).

7- Go under the BACKUP tab and click on RESTORE DATA.
8- Locate the uncompressed folder stored under step # 2 and click on OK.
9- A message saying that the backup was restored successfully will appear.

10- Logout and log back in.

11- Go under the DEVICES tab and click on CONTROLLER.
12- Select the controller from the down arrow and than click on the KT-300 tab.

General	KT-300	Options
Serial number		00000000

13- Locate the serial number of the controller and type it in under the field labeled SERIAL NUMBER (i.e.: A3011987). Click on Save.
14- Go under the USERS tab and click on card. Select one card using the up arrow key right next to the card number (00:00001).

Card number   00:00001

15- Click on the SAVE AS icon and enter a real card number from one of the card that were supplied with the demo unit. You may select DELETE THE ORIGINAL CARD and hit OK. Than hit SAVE.

16- You may repeat step # 15 for all the cards you want to define. You may select another card (step 14) in order to get more than one profile.
